

The 37th International Congress on Electrophysiology

Welcome to Lund

Lund University will host the annual **International Congress on Electrophysiology (ICE)** June 3–5, 2010. The scientific sessions of the congress will cover a broad spectrum of topics, ranging from basic cellular processes to clinical applications.

The venue is located in the very heart of Lund, a medieval university city in Southern Sweden where you will enjoy a warm atmosphere, rich culture and history. Being called The City of Ideas, Lund is a key research site within the Medicon Valley, one of Europe's strongest life science clusters.

The abstracts submission deadline is February 1, 2010.
Early registration can be done until April 1, 2010.

For more information visit: www.ice2010.se

Keynote Lectures

- ECG evolution in acute coronary syndrome
 - Imaging in cardiac arrhythmias
 - Integrative modeling of cardiac arrhythmias
 - Non-invasive risk stratification in ischemic heart disease
 - Progress in atrial fibrillation diagnosis and management
 - Sudden cardiac death risk prediction and evidence-based therapies
-

Special Sessions

- Advances in magnetocardiography
 - Cardiac long-term monitoring with implantable devices
 - Cardiopulmonary resuscitation
 - Computational Cardiology
 - Emerging monitoring techniques in cardioneurology
 - Inherited arrhythmic disorders/Channelopathies.
 - Ion channel basics and new antiarrhythmics
 - Methods for detection of subtle ECG phenomena
-
